Dear Joshua:

I'm sorry I haven't answered sooner but I've been chasing back and forth between Philadelphia and New York and around the Hospital, seeing about a new laboratory which is going up. I haven't done any biological experiments since I've been back, and possibly won't 'till September. I'll be doing some related things at Cold Spring Harbor this summer, and if you're East, I'll be glad to see you and chat.

André Lwoff is reading the paper which I'm enclosing and I'm prepared to take all reasonable suggestions. Please return it when you're finished. I'm going after the hypothetical phosphates as soon as I can get to them.

Sincerely,

Seymour
